

MINES AND MINING

THE GOLDEN COUCHITI.

W. S. Sundon is opening up a fine looking prospect which he has located in Peralta canyon, and which joins the Aunt Betsy on the north. Mr. Sundon feels confident that the big Aunt Betsy lead, on which a rich strike was made a short time ago, runs through his claim. He intends to continue development on the lead as encountered.

Tom Shields and John Murphy are doing considerable development work on the Harrison No. 2, in Peralta canyon. They are now working on a fine body of ore which is increasing in width and value as depth is gained. The Harrison No. 2 is, without doubt, a valuable property and will in a short time be in shape to furnish a large amount of milling ore.

George Ostrander is doing steady development work on the King, a big property owned by him in Peralta canyon. He is now working in three feet of ore which is improving with depth. The King will be in shape this spring to produce a large quantity of ore.

H. V. Smith is sinking a shaft on the Yankee blade in Costa canyon near the Athamarie. Mr. Smith informs us that the Yankee blade is developing into a fine property and that it contains twelve foot lead of fine quality in character to that produced by the Athamarie.

James Sherlock has commenced work with a small force of men on the Aunt Betsy. A tunnel has been started which Mr. Sherlock intends to drive about 200 feet to intercept the lead at a good depth. This work, when completed, will put the Aunt Betsy in shape to furnish an almost unlimited quantity of ore which can be taken out through the tunnel.

Charles Paxton has resumed work on the Ellen L. He is driving a tunnel which will intercept the lead at a depth of 100 feet. It will be necessary to drive the tunnel about forty feet further, at which point Mr. Paxton expects to cut the lead, which shows fair ore on the surface, and we have no doubt the Ellen L., when opened up at a depth of 100 feet, will become a producer.

Major Beaumont was over from Peralta canyon on Monday. He informs us that he is now working in a fine body of ore on the Ivanhoe, one of the big properties in Peralta canyon, on which he is interested. The major is driving a cross-cut on the lead and has twelve feet of ore exposed and expects to drive twelve feet more before reaching the opposite wall. The Ivanhoe, when opened, up will without doubt be equal to anything in the Cochiti district.

Henry Lockhart is doing considerable work on the Glenco, on which a strike of \$300 ore was made a short time ago. At the point where the ore was discovered the lead was only one foot wide, but recent development has increased the width to two feet of ore which runs \$300 from wall to wall, and which is being sacked for shipment. We understand that U. S. Austin of El Paso, Tex., has purchased a one-sixth interest in the Glenco from Ben Johnson of Albuquerque. - Bland Herald.

HILLSBORD MINES

Carl Clausen, the well-known mining engineer, has arrived from Las Cruces with a force sent to review work on the Elewellyn tunnel in Animas Peak, one of the greatest feats in modern mining engineering in this district.

Four Mexican dry washers of the Hillsboro places sold \$150 worth of gold dust and nuggets to Merchant Tom Long on Tuesday. They said it was the result of five weeks' work by four of them.

A "pocket" containing \$300 in gold dust was harvested this week at Gold Hill, the main vein in the Richmond by miners Wayland and Zimmerman.

The firm of Robins & Clegg bought \$75 worth of gold dust and nuggets last Friday from Mexican dry washers. Keller, Miller & Co. bought \$675 worth of gold there, being valued at \$92.

Two sacks of ore taken out of the very steady mine Monday by Lensors W. Ward and Chavez were valued at \$400 and were locked up in the mine office for safe keeping.

One Smith is making a shipment of 32 tons of ore to the outside world from his community mine.

A piece of ore weighing about 700 pounds and containing fine gold to the stated value of \$115, was taken from the Tripp mine yesterday. It is the second and perhaps the best specimen of the Tripp mine ever taken.

Charles H. Myers is busy at present in the camp around the M. & M. mine, putting up a new plant.

W. W. West sampled out \$800 in fine ore while in the lead camp at Silver Star. During his presence gift money was given to the miners in the amount of \$100. His property is owned by our friends, S. C. and G. L. for the values received are great. It is owned by persons who would work it steadily.

W. J. Ruckerman, representing a partner's syndicate, was in the camp several days last week and bonded two or three claims.

145 tons of Opportunity and Snake mines ore, from which Manager Hughes informs us that a saving of fully 50 per cent. of value is being made. This proves what Mr. Welsh can do with ordinary ore, and our miners feel satisfied.

Hillsboro, Calif., experts in 300 tons double its million dollar gold output of '98, and the Hillsboro expects to double her half million dollar output the present year.

Colonel Harry Bassett has been here at work developing his recent big find in Picher Basin.

So far reports of "sinking" mining claims in the Hillsboro district are greater than in the beginning of former years, and the Advocate expects to hear of a few very sudden deaths occurring one of those fine meetings.

Dr. Frank L. Green has started up work at his prospecting mine in Richland Gulch, employing a force of six men.

A three pound chunk of quartz lately splashed with native gold, was taken from the south drift of the Stake mine Monday, and sent to H. S. Porter of Denver for a paper weight.

Hopewell A. Tonkinson has shipped a shipment of 25 tons of Second No. 1 ore to the Porter mill.

Ed Stockland is engaged this week in plotting a party of Cleveland citizens who have arrived in the Hillsboro placer district.

Let our miners remember this fact and there will be fewer complaints coming to the ears of the Advocate. That the legal locator of a placer mining claim has the exclusive right to the possess thereof, and a prospector cannot legally enter the bounds of a placer claim and discover a subsequent hole claim unless there has been abandonment of the placer claimant.

Sheriff May L. Kather has seized the Bull of the Woods property for \$2000, paying out the cost of the money down. He has put seven men at work on the tunnel.

T. P. Chapman, the prominent mining man after a series of several weeks from the camp, was able to be at the Eureka mine Tuesday to conduct the shipment of 35 tons of ore to the Phoenix mill, Sierra County, Advocates.

MOGOLLON

Silver City Enterprise

The Confidence mine is working the usual force of about 70 men. The ore bodies in the mine are of greater extent and better average grade than ever before. The main adit levels has attained a length of over 1,500 feet. The new or bins at the main working shafts are completed. The electric hoist will soon be put in place, the poles, on which the electric cables, which will carry the static and powerful current from the power station at the mill, are all in place. The cables will soon be strung, so big motor to generate the electric current has arrived and is being put in place and will soon be connected with the great water power system which will run the whole machinery for generating the electric force. The country hill on Whitewater is running steadily and turning out a steady supply of gold and silver bullion. While many other good mines in the camp have been compelled to suspend operations from one cause or another, General Manager Hugh H. Price has made a magnificent success of the often troubled company's property. He is entitled to all the more credit, that he took charge when the mine was gutted out, but he has made it pay its way and has developed wonderful ore reserves which are now ready for extraction. This company made another good strike recently in doing the assessment upon the North Alpine mine, one of the company's properties near the Confidence. A 100 bushel of ore was struck which runs over high in gold and carries a large percentage of copper. Such good management is keeping this company in high credit.

An Oliver dry washer, belonging to some and tried to fit the rest of the crew. The company's men discovered the experimental process.

Two men from the state spent the winter condemning the work of others instead of spending it on improving their own.

One man succeeded during only four months.

A LITTLE LIGHT.

Every young woman needs a little light upon the subject of health. There is far too much now taught, particularly among mothers. Every young woman should have a plan to live by, to keep her body strong and wholesome, and free from weakness and disease. Her general health, her future happiness, her good looks, her physical strength, her capability as a wife and mother, and the health and strength of generations to come are dependent upon this.

Nothing in the world will destroy the

TERRITORIAL MATTERS.

LAS VEGAS.

Optic

W. A. Long and bride regressed to Las Vegas yesterday on Nov. 17, and were met at the depot by a large number of interested friends. They were most cordially greeted and congratulated. This morning an Optic reporter dropped into the popular Plaza grocery and found Mr. Long filling orders and superintending his business just the same as though nothing had happened. He reported pleasant trip and fine weather at Kansas City.

A letter received yesterday from Mrs. A. J. Tyler to her husband, states that Mrs. Tyler is improving, although he is still in a very weak condition. He hopes the benefit of the attention of five physicians and dues of the care that interested friends can give. The presence of his mother will no doubt be very much of assistance, and every hope contention that she is necessary, though possibly she will return.

SAN MARCIAL.

Oleo

A rumor is in circulation that Dr. E. S. Davis, formerly of San Marcos, and recently deceased in an eastern asylum, died a few weeks ago.

Mrs. Nola Wilson and babies left San Marcos for Fortified Ran, this week, where Mrs. Wilson's mother will enjoy her legacy for some three weeks.

A resident of San Marcos informed the reporter yesterday that he had buried the caskets which were buried near here after the battle of Valverde.

Domingo

Headlights

Born, to be wife of A. J. Clark, was Sunday night, a twelve pound girl. All parties doing well and Tony looks as more good natured than ever.

Sheriff Blair has made the following appointments of deputies: At Price, Alton, Robert Parker, at Central, George Moore, at Santa Rita, Edward Swanson, at Deming, John Phillips, at Leedburg, Theodore Phillips.

LAS CRUCES.

Doña Ana County Republican

Max Garein of Doña Ana, who was Mayor of the same place, had a hearing before Justice of the Peace Lopez on Wednesday and was bound over in the sum of \$300 to await the action of the grand jury.

Rosario Aragon, one of the participants taken at Colonia last week, was fined \$100 in the sum of \$3500 on the charge of stealing a horse from a man by the name of Paulino at Lake Valencia. The case was tried before J. P. De la O.

Last Saturday a public meeting was held in regard to new County matters. A committee consisting of M. Lehman, P. H. Coffey, Jose Luisco, P. F. Garrett and A. McEntee, was appointed to go to Santa Fe and furnish necessary information to the legislative committee.

Miss Nedra Hill, who has just finished a six months' term of school at El Paso, was married this week to a young man of Durango, Mexico. The news came as a surprise even to her own sister, who is now residing at Durango. Miss Isabella Hill left for El Paso Tuesday to extend her congratulations to the couple.

Big Grind Republicen.

J. B. Hill, who has been confined to his bed for the last two months with severe rheumatism, less severe now, is due to ride to take his daily airing town.

Rosario Aragon, who was fined \$100 in the sum of \$3500 on the charge of stealing a horse from a man by the name of Paulino at Lake Valencia, was released.

Donna McCall's illness has taken a very severe form. For the past three days she has been delirious with fever and is very weak. His physician now fears for her ultimate recovery.

The Presbyterian mission school, in charge of Mrs. and Miss Donnelly, is now in a fixed running order, after being closed for two months on account of smallpox. The school after opening in the fall term was never in a more florid, healthy condition, and it is expected will be longer, what was lost by the enforced absence. There are several short term prices.

C. H. Bell, who has been confined to his bed for the past two months with a severe case of rheumatism, is now in a much improved condition.

John C. Jones, who has been confined to his bed for the past two months with a severe case of rheumatism, is now in a much improved condition.
