Dear Sirs:

Since you folks did not go through with the deal on my Magdalena lead and barite property just $1\frac{1}{2}$ miles north of Magdalena and since Mr. Eddy says it was no fault of the property, would you be so kind as to send me a copy of Mr. Elstone's report. Just so I may have a copy. With nothing against you folks. Thank you very much.

If you should care to consider the Bingham property that is a part of or the south $\frac{1}{2}$ of the MexTex property that you folks looked at sometime back out of which we have sold over a million dollars worth of lead to the smelter before our mill burned 2 years ago and which was only beginning to get in the ore. Mr. Eddy says he wrote a note about this property on the bottom of Elstone's report on the Magdalena property. I appreciate the men you have had down here and if you would like to consider the Bingham property will give you a good deal.

It looks to me like where you folks spend the money you do looking for something worthwhile and the smelter returns prove that we have sold over a million dollars worth of lead single barrell, that is and let the barite go out in the tailies which would be worth now as much as the lead, and as Mr. Eddy will tell you what we took out only barely touched the ore body.

With barite coming into play as it is now and lead even at 12¢, what more positive proof of a paying operation could any company be looking for on a double barrel deal like this with either the lead ore or the barite paying operating expenses at all times and the other one left for clear profit.

If you care to consider this please call or wire. Before I go any further into a deal with Nat. lead as Mr. Eddy knows about. They have also looked at the MexTex and have just found out about ours but not looked at it yet. If the rest of you folk are as fine men as Mr. Eddy and Mr. Elstone I would sure like to deal with you folks on this good property that has been proven beyond doubt.
