

MEMORANDUM

TO: Steve Frost, Coal Geologist, NMBMMR

FROM: H. B. Nickelson, Mining Geologist, Consultant, NMBMMR

SUBJECT: Reclamation evaluation for OSM, Gallup Field, Gallup West,
Crescent Mine

Crescent Mine 2500' NL, 4700' EL, 28-15-18 Loc. 33

There is almost no information concerning this mine in the literature. Early mine inspector reports stated that the Union mine was to build a tram line to the Crescent mine tipple, which was apparently served by a branch line of the railroad. The mine was opened by a slope and probably ventilated by a furnace. At the present time the site is marked by a mine dump that has been leveled to provide ground space for a store; the reclamation has been done.

The site of the Crescent mine is marked on the map by a cross. No photos were taken, and no work is needed.

H. B. Nickelson

Don, your copy of the map does not have the cross on it. Have someone place the mark at the location given in the title.
