Mr. Hugh E. Bearup 319 Tungsten Street Henderson NV 89015

Dear Mr. Bearup:

The data package for your Mogollon district, New Mexico claims, which you recently sent to Mr. Owens in our Dallas office, has been handed me for consideration and reply.

While some of the evidence of mineralization is certainly interesting, and might well warrant further prospecting and evaluation, I'm afraid we would not be interested in pursuing this further at this time. That decision is not based on any particulary negative appraisal of your holdings, but rather on the fact that our exploration efforts are fully committed to other existing projects and opportunities at the present time.

Thank you very much for thinking of Sunshine Mining Company, and the best of luck in your further efforts to place these claims.

Very truly yours,

Gary L. Ojala

Manager of Exploration
